

Wo

rthless blacks in Africa, Haiti and everywhere else on the planet, including the US, have been nothing but a giant black hole to pour our wealth and misplaced cares into from day-one — even though we're expected to think they're so great. I've had it with the stinking lying bull crap!

By Phillip Marlowe

I was reading over at [Daily Stormer](#), the Internet's most censored site, about some big Brit Naturalist White guy who was over in Africa trying to protect animals from poaching and he was stabbed to death by the natives. That's when I remembered once kindly suggesting here on my site how it would be infinitely better to just let all Africans starve to death to help Mother Nature — instead of hindering her.

Shocked? Sure, I'm a hard ass these days. But the White race has done more than enough for the black race by now. Instead of respect and love, they spit in our faces every minute of the day. Plus, they freely assault Whites on the streets with things like the "knockout game," while robbing, raping, torturing and murder (including our elderly mothers and

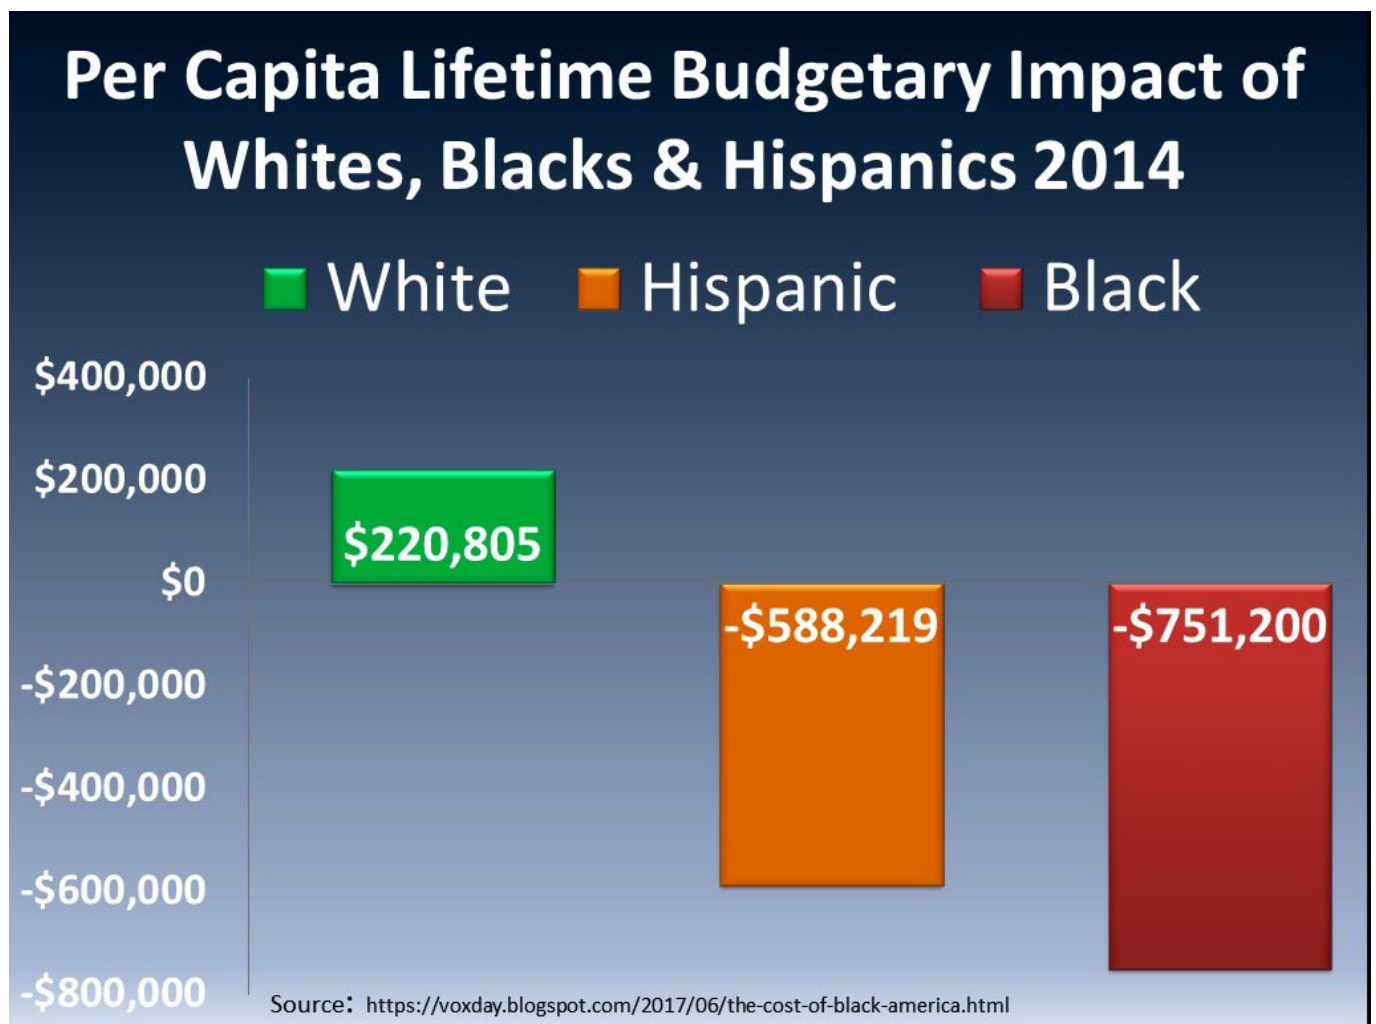

children). Most people don't know the [evil crimes blacks perpetrate against Whites](#), because the traitorous media works constantly to protect this criminal race.

I'm not saying to keep them from eating food they get on their own from working for a honest living (lol) or from growing crops. Just stop giving them all that free taxpayer stuff and money on a silver platter anymore. If blacks want to stand up on their own two feet, that's entirely up to them. We merely need to say no to the spoiled brat's never-ending race demands and see what happens.

I'm also a big animal lover and nature boy. The four-legged kind. Let's just let Mother Nature take its natural course for the sake of the planet. Natural equilibrium is no sin. We needn't berate ourselves forever more over this stinking race. They've had their chance to act civilized and they've blown it. Time for a little "tough love."

Yep, the black race sucks. Here they are constantly complaining about practically everything, accusing us Whites of racism every minute, murdering each other and us White people at the drop of a hat, while sucking beaucoup dineros in “entitlements” out of the taxpayers. Hell, America would be on Mars today if it wasn’t for the worthless bastards holding us back. Instead, we have to see them in all the movies promoted as the great heroes of America — the military, the now moribund space program and the always smart and brave ones in Sci-Fi movies, etc., etc. Totally ridiculous.

Blacks are indeed a worthless drain on America. I read somewhere that every single black living in the USA is a negative \$750,000 net loss to country’s bottom line. That’s the cost of the black race averaged out across census numbers. Welfare, food stamps, Section 8 vouchers to pay rent, free sailphones, hospital emergency room visits, gunshot and knife wound surgeries, police and court costs, prison expenses, etc., etc., ETC. The return on investment (ROI) for the black race has been way past worse than zero.

[GO HERE](#)

Did you know that one out of every three black males you see out on the street has been or will be incarcerated for a crime? That's right. Each will cost tens of thousands in court costs and bureaucracy alone. Black neighborhoods cost tens of millions of taxpayer dollars every year. Just imagine the cost of Haitian and Somalis immigrants to the US? We're truly importing nothing but crime and debt from total Shithole countries.

I remember this big rock and roll effort called "Live Aid" back in the '80's to get the kiddies of the West to pony up money to save Africans in another mass starvation. They had all these rich celebrities singing in a sound studio this stupid bubblegum song, "We are the World," and played the crap out of it 24/7 until I came seriously close to becoming unglued. I think most of the donated food ended up in the hands of African Warlords who soon shot up a bunch of our soldiers in Mogadishu, Somalia (the "Black Hawk Down" thing). These people don't care one lick about their own. Never have.

Just let 'em all starve to death!

Exc

ited jiggaboos drag a White dead US soldier's body through the streets of Mogadishu, Somalia in 1993. After all the help we give to these stinking ungrateful bastards!

*Afri
cans aboard a rickety boat in the Med, trying to get to Europe. You see any women? The more we give Africa in money and food, the more they breed and overpopulate, while the excess males try to get to the West by hook and crook — further destroying our lands with rape, murder and government freebies. Think it out, will you!*

Street scene in Lagos, Nigeria. There's not a single country controlled by blacks that's not a total overpopulated shithole. Everyone knows this is the case. The more they get from White countries, the more they breed and the more they need. They have ZERO organization and planning. Most of them just want to come here to live off Whitey — since they well know their race is utterly worthless.

Let's get this quite straight: Blacks don't give two flying fucks about any "Mother Nature" crap, contrary to anything idiot liberals try to say. I saw a recent phony TV commercial and it had this black guy actor supposedly doing lovely, sensitive pencil sketches of African wildlife in the field (probably really done by a White). My ass. Environmentalists and Nature lovers are always White, or Westernized Asians — who have at least brain-one.

How many times have I ever seen blacks out backpacking in the woods? A big fat ZERO. Hell, I can't even recall ever seeing them "car camping" anywhere. Others have recognized how few blacks ever go to national parks and to explain matters, lefty morons have said such places are "inherently" racist! I have indeed read that.

Let me state unequivocally: Blacks are the most worthless race on the planet. Absolutely. The less of them alive, the better for the planet. No doubt whatsoever.

When it comes to the environment, leftys should be totally on board with my suggestion to let them all starve to death.

It would only takes a few years for most of them to die off. Along with mass starvation, warfare over the scraps will kill millions — until they run out of bullets for rusty, rarely cleaned AK-47s. They'll probably have enough steel knives and machetes to kill each other for sometime after that.

Just a few years will be all it takes. Whatever Negro survivors left will stabilize into small warring jungle tribes in five to ten years or so. In only a few years the environment would once again be on the rebound. Should any of the surviving apes resort to poaching of valued wildlife, we can employ military aerial bombardments and drone strikes against their jungle camp sites and village headquarters. They'll soon get the message.

No more financial aid to black countries. No food or drug shipments. Cut them off completely. Bring back all medical aid workers and any aid organizations like "Doctors without borders." Completely stop any travel to and from these filthy shitholes.

I guarantee in only a few short years a much better planet.

We should just do the same thing here. No more freebies for lazy Sheboon women sitting on their fat stinking black asses in the hood. No more Affirmative Action, either. No more free food, welfare and sailphones. No more free rent Section 8 vouchers. Explain to them if they don't get their act together they will simply starve to death.

And if they try to march in the streets complaining about it, we'll use extreme measures this time around. After a couple of riots where we simply blow them away with a few choice seconds of electrically-powered Gatling guns from armored personnel carriers, I promise all their demonstration BS will end. Any who harm a single hair on a White's head, we'll hang them by the neck until dead. Build multi-station hanging gallows in every city where we publicly execute the bastards on a weekly basis.

We can start with the ones in prison already. Think of the billions we'll immediately save right off the bat in jail expenses.

After only a few years we'll have plenty of savings for building a kick-ass space station and maybe even a few Arthur C. Clarke space elevators up to earth orbit where we can launch manned missions to Mars. Asteroids can be mined for rare metals. Money wasted on this race can also be earmarked for energy and anti-gravity research (sounds crazy but true). Once we get that figured out, things will be just like the Jetsons!

Meanwhile, we'll regain our sanity and sense of personal safety. We'll have fantastic outdoor parties and concerts without having to worry about criminal black gangs ruining things. And just imagine how beautiful our cities will once again look. Hell, we'll just bulldoze over all their poorly maintained crummy neighborhoods and plant lushly

We Should Just Let All Negroes Starve to Death

landscaped parklands and golf courses. Or simply save money by letting Mother Nature take over again.

And all we got to do, is tell this stinking, big mouthed race to go straight to hell. They don't appreciate one damn thing we ever do for them anyway!
