POLL: Who Do YOU Think Assassinated JFK?

It's the question that still lingers in the back of our heads to this very day and for damn good reasons, too. Because it's not so much all the things that happened on November 22, 1963, but what's happened to the United States of America since then.

That's right. You instinctively feel that something was just not right that day, and America took a seriously wrong turn around this time. Whether it was directly related to the Kennedy assassination or not, the floodgates of change were thereupon unleashed on this country — very possibly by the same forces responsible for having the man whacked!

Countless books, movies and articles have been written about the Kennedy Assassination, but one thing stands out like a sore thumb in all of it — even screams out — is that the Jews or Israelis are never mentioned in the mainstream media. Everyone else but: the Italian Mafia, the anti-Castro Cubans, Waspy CIA — all are looked at with jaundiced suspicion, but never the damn Jews! But that's par for the course in the US, right?

Nor are certain scary facts mentioned, if at all. One very big example: Kennedy, five months before his death, signed off on Executive order #11110, which authorized the US Treasury department to print silver-backed certificates, completely by-passing the private
monopoly parasite called the Federal Reserve.

[youtube=http://www.youtube.com/watch?v=_WSGwnz7XpY]

Kennedy also made several speeches were he alluded to a secret conspiracy threatening US sovereignty. He was certainly aware of the real powers that be and undoubtedly had dealings with these people; as well as being told by his own father of just who they were (it's well-known that Joe Kennedy had advance knowledge from his Jew chums of the stock market crash of '29 and used it to sell "short" taking him from 10 million to 100 million richer).

Another thing, Kennedy wanted to bring the hammer down on the Israelis, right at the moment of building the infrastructure that enabled the Jews to build a nuclear bomb (200 million was spent by that point, or about one billion in today's dollars). In fact, Kennedy was all set to deliver a letter, threatening to have international atomic inspectors pay Israel a visit. David Ben-Gurion, Prime Minister of Israel at the time, hated and disrespected Kennedy completely, so when Kennedy sent the letter to the US embassy for hand delivery, Ben-Gurion up and quit for "family reasons" before they could do it. This gave the Israelis some time and before Kennedy could make do his threat, someone blew his head up.

When LBJ took over, he totally changed things around in Israel's favor (more below).

[Caption id="attachment_54111" align="alignright" width="239" caption="Jack Rubenstein"]

Also, it's rarely mentioned that Jack Ruby was a Jew. They go on about his possible Mob connections in Chicago, never touching the Jew part, only that he was too "Meshugge" for the Mob (Yiddish for crazy); all this talk was just setting things up to explain away his "emotional over-reaction" to Kennedy's death. Even the business about the timing of him being there in the
police garage while his beloved pooch was still locked up in his car somehow explains away everything.

All the first reports out of the media on the day he shot Oswald called him Jack Rubenstein, but then suddenly stopped within the hour, going with the Dallas nickname everyone knows him by. You never, ever hear them use his real last name in the mainstream media today. It must now be *verbotten*.

Any other possible motive of this man beyond being angry at "Jackie turned into a widow with those kids," is awkwardly left unsaid by the mainstream media. Ruby could easily have been asked to give it a "shot" if the opportunity arose, taking one for the tribe if the situation presented itself. Ruby would be the ultimate "Sayan," or a Jew who will do absolutely anything sneaky for the Jewish people or the State of Israel.

Get this crystal clear: Jews do NOT think like Whites when it comes to themselves or race. America is not important for them, the only thing important is whatever helps their own kind is in the end -- anywhere. Jewry has proven this time and again. That's the big problem that White people just can't get their heads around.

*Congressman Albert Thomas* is seen aboard Air force One smiling and winking at Lyndon Johnson (probably a Texas crypto-Jew) just before he took the oath of office. If you pay attention, this photo always gets cut from any Kennedy assassination documentaries you see on mainstream TV. Johnson was certainly an insider to the false flag attacks of the USS Liberty and the Gulf of Tonkin, right along with starting all the pro-Israel and civil rights crap we're stuck with today.
Now, generally speaking, I'm not one who spends a lot of time still questioning the forensics involved in the assassination (I've read my share, believe me). But if you ever get a chance, go look out the 6th floor Book Depository window (I have), you'll see what a close shot it was. 88 yards would've been a chip shot for a rifle with a scope. If it was properly sighted in, Oswald or whomever it was, would not have been the least challenged. Also, the car was moving directly away, so "leading" the target would not be much of a factor.

And I never was wrapped up in the Grassy Knoll business (but another shooter may been somewhere), along with all the doubts about the so-called "Magic Bullet" stuff.

Being a hunter, it wasn't so unbelievable to me that bullets do strange things. Like when that first shot missed and went on to hit a curb across from Dealy Plaza; this was almost certainly caused by a branch in a tree deflecting the bullet. People have a hard time seeing how a little tree branch can do something like that, but can if it hits at just the right angle.

Also, bullets can slide across bone and ricochet way off-course in much the same way. The only slight question ballistic-wise, in my humble opinion, was the angle of the entrance wound to that second shot, as it hit his upper back, then exited at the top of his tie, that it was fairly high to have happened with the downward angle Oswald was shooting from. But it's possible. Right along with the bullet going on to slam into Connally's back sideways, curving along his ribs and hitting his wrist, finally come to rest in his thigh.

Sounds improbable, but again, bullets do really weird things when traveling 2000 feet a second. Also, questionable are where the bullet or fragments ended up after the third, kill shot exited Kennedy's head.
That business about Kennedy lurching backwards after being struck in the head never really meant much to me. This was the part in Stone's JFK movie where Kevin Costner droned on and on about Zapruder's film: "Back and to the left..." People's bodies often react like this when half their brains get turned to pulp and their nervous systems go on the fritz.

Oswald could very well have been the lone gunman, yet still part of a larger conspiracy (it only takes two). He fancied himself in such a way that he may have been taking advantage of by hidden, manipulative people. They played on his spy fantasies and offered him an opportunity to return to the Soviet Union, when it was known he wanted to by that point.

Shortly before the assassination, Oswald made a trip to the Soviet Embassy in Mexico City to unsuccessfully beg for re-admittance, and in doing so, may have gotten the notice of the wrong people. Or he may have attracted them when he lived in New Orleans.

At some point he caught the attention of a very small Zionist clique within the CIA, who then alerted outside cohorts that the perfect candidate for a patsy had been found. His background and weaknesses were seen as ideal for a cut-out and misdirection. Wheels started turning. When they knew Kennedy was to be in Dallas, he was contacted and brazenly lied to, promised that if successful, he would be spirited out of the country to the life of a Commie hero.

He may have had help or last minute instructions at the Book Depository; several witnesses reported seeing more than one person in that infamous window before the shooting. Oswald was also seen in the Book Depository cafeteria by a policeman within two minutes after the shots. Although, he could have sprinted down the stairs in time to have done this, it's always been somewhat problematic.

Perhaps he was told by these people, once he took the shot or helped the shooter, to simply go back to his apartment and then walk down a certain street where he would be picked up and
driven to a safe house. After the heat died down, he was promised to get ferreted out of the
country for return to a hero's welcome in Russia or Cuba. When Dallas policeman Tippet pulled
up alongside him on that street, he might have came to the conclusion he was set-up for a fall
and, seeing all his hopes go up in smoke, panicked, shooting the guy.

And the "Lone Gunman" business could be a GIANT lie to begin
with...

[youtube=http://www.youtube.com/watch?v=dvLW3IBHHvA]

Here's a fascinating video that cast serious doubt on the Zapruder film. Make sure to watch all the parts (it may get boring sometimes), since it contains some shocking evidence the film is not what you think. You be the judge.

Of course, it's very possible that everything we think we know about the JFK assassination is totally in error. Watch the above video about all the inconsistencies in the Zapruder film. The mainstream view of the crime is seemingly corroborated by just this one film — shot by Abraham Zapruder, another Jew who just happened to be in the right place at the right time. The "lucky" Jew was paid $150,000 for it by the Jew media ($900,00 in today's money), where it sat hidden from the public for over a decade.

But what if this one film wasn't on the up-and-up to begin with? Supposedly, there is an original print, not tampered with and surreptitiously bought by Texan millionaire H. L. Hunt from the original developer. It shows evidence that would blow the Kennedy case wide open — such as the Stemmons freeway sign being hit by a bullet, the limo slowing nearly to a stop as Kennedy gets shot twice in the head (which explains a lot).

Below is an interesting review of a underground and out of print book that's considered way too hot for any major publisher to pick up (I've never read it). Supposedly, someone explained the book's premise to Walter Cronkite on a deck overlooking Martha's Vineyard and he paused for a few moments as he looked out to the sea and then turned back and replied "I can see that."

Final Judgment: The Missing Link in the JFK Assassination Conspiracy

by Michael Collins Piper

[caption id="attachment_54117" align="alignright" width="144" caption="Clay Shaw"]
The Last Word on the JFK Assassination, November 28, 2002  
Reviewer: Mark Braver from Chicago, Illinois

There seems to be a lot of misperception of what Final Judgment does and does not say about the JFK assassination. The book does not say that "the Jews killed JFK." That's horse manure.

What the book does say is that: When New Orleans District Attorney Jim Garrison charged businessman Clay Shaw with participation in the JFK assassination conspiracy Garrison stumbled upon the Israeli Mossad connection to the murder of President Kennedy. Shaw served on the board of a shadowy corporation known as Permindex. A primary shareholder in Permindex was the Banque De Credit International of Geneva, founded by Tibor Rosenbaum, an arms procurer and financier for the Mossad.

[John Coleman, ex MI6 agent writes in his book The Conspirators Hierarchy -- The Committee of 300:]

Yet the Assassination Bureau is absolutely real. It exists in Europe and the United States solely to do the bidding of the Committee of 300 to carry-out high-level assassinations where all other remedies have failed. It was PERMINDEX which ran the Kennedy-assassination under the direction of Sir William Stephenson, for years the Queen of England's number one "pest-control" operative.

Clay Shaw, a contract-agent of the CIA, ran PERMINDEX out of the Trade Mart Center in New Orleans. Former New Orleans District Attorney Jim Garrison came very close to cracking the Kennedy assassination-plot up to the level of Clay Shaw until Garrison was "dealt with" and Shaw was found not guilty of involvement in the Kennedy assassination-plot. The fact that Shaw was eliminated in the manner of Jack Ruby, another CIA contract agent--both died of induced quick-acting cancer--speaks volumes that Garrison was on the right track. (Jack Ruby died of cancer in prison, in January 1967) ]

What's more, the Mossad-sponsored Swiss bank was the chief "money laundry" for Meyer Lansky, the head of the international crime syndicate and an Israeli loyalist whose operations
meshed closely on many fronts with the American CIA.

The Don of Dons and fanatical Israel loyalist, Jew Mobster Meyer Lansky, in Jerusalem. What people don't get is that the Jewish Mob was always bigger and smarter than the Italian mob -- ever. So much so, it appears they've succeeded to the point of controlling entire nations. Like ours.
Zionists Louis M. Bloomfield and his brother Bernard (behind shoulder) meet the "Father of Israel," David Ben-Gurion (right) in 1949. Bloomfield was closely associated with Canada's mega-rich Bronfman family, who controlled the Jewish Congress for decades and ran the global holocaust shakedown racket. They are also linked to John McCain (read more here). [INCOG]

The chairman of Permindex was Louis M. Bloomfield of Montreal, a key figure in the Israeli lobby and an operative of the Bronfman family of Canada, long-time Lansky associates and among Israel's primary international patrons.

In the pages of "Final Judgment" the Israeli connection to the JFK assassination is explored in frightening--and fully documented--detail. For example, did you know:

• That JFK was engaged in a bitter secret conflict with Israel over U.S. East policy and that Israel's prime minister resigned in disgust, saying JFK's stance threatened Israel's very survival?

• That JFK's successor, Lyndon Johnson, immediately reversed America's policy toward Israel?

• That the top Mafia figures often alleged to be behind the JFK assassination were only front men for Meyer Lansky?

• That the CIA's liaison to the Mossad, James Angleton, was a prime mover behind the cover-up of the JFK assassination?

[caption id="attachment_54119" align="alignright" width="125" caption="Arnon Milchan"]
Why didn't Oliver Stone, in his famous movie "JFK" not mention any of this? It turns out the chief financial backer of Stone's film was longtime Mossad figure, Arnon Milchan, Israel's biggest arms dealer.

The very fact that the Israeli lobby has gone through such great lengths to try to smear Michael Collins Piper and to try to discredit Final Judgment gives the book great credibility. If the book was really so silly or so unconvincing, it doesn't seem likely that groups such as the Anti-Defamation League would go out of their way to try to suppress the book as they have.

The fact is that Piper demonstrates that Israel did indeed have a very strong motive to want to get JFK out of the way and that numerous people who have been linked in other writings to the JFK conspiracy were (as Piper documents) also in the sphere of influence of Israel's Mossad. Not only Clay Shaw in New Orleans, but also James Angleton at the CIA, who was Israel's strongest advocate at the CIA and also the CIA's liaison to the Mossad. The Israeli connection is indeed "the missing link in the JFK assassination conspiracy."

The "Reader from Chicago" who wrote the review of Final Judgment posted here is really off the beam and I suspect he (or she) is deliberately distorting what Piper's book does say in order to try to discourage people from reading it. http://jahtruth.net/freedman.htm

The fact is that Piper's book documents (quite clearly, in my estimation) not only the means, opportunity and the motive for Israeli Mossad involvement in the assassination (working in conjunction with the CIA), but it is also quite a fascinating and very interesting read. "Boring" is the last word I'd use to describe the book, and it is certainly not "poorly written."

[caption id="attachment_54120" align="alignright" width="320" caption="The totally bizarre hairless pedophile, David Ferrie."]
What's more, the book is not--I repeat--not anti-Semitic and the book has absolutely nothing whatsoever to do with the subject of the Holocaust. In fact, anybody familiar with any of the standard writings on the JFK assassination will recognize the names of some of the key players in the scenario Piper documents: Clay Shaw, David Ferrie, Guy Banister and James J. Angleton of the CIA -- and none of them were Jewish. So where this reviewer gets off saying that Piper finds "a Jew under every rock" is beyond me. I have read literally hundreds of books and magazine articles and other material on the JFK assassination and not in a single one of them -- with the exception of Final Judgment -- did I ever learn that President John F. Kennedy was trying to stop Israel from building the nuclear bomb and that this literally touched off a "secret war" behind the scenes between JFK and Israel's prime minister, David Ben-Gurion, who resigned (among other reasons) in disgust over JFK's policies with Israel. In fact, Israeli historian Avner Cohen in his book, Israel and the Bomb, documents this quite thoroughly.

And in Final Judgment Piper also outlines some interesting Israeli connections by people who have been linked to the JFK assassination and cover-up, including Clay Shaw of New Orleans. Even Israeli journalist Barry Chamish has written in an Internet review of Final Judgment that he finds Piper's Israeli connection (via Shaw and Permindex) quite convincing.

There was a controversy in the Chicago area following an attempt by the Anti-Defamation League (an Israeli lobby organization) and people associated with the ADL to prevent Final Judgment from being placed in the Schaumburg Township District Library. Chances are the Reader from Chicago is probably an ADL representative! -- This text refers to the Unknown Binding edition.
